irfan2229.vercel.app

## MERN STACK

- MongoDB / Mongoose
- Express.js
- React.js (Hooks, State)
- Node.js

## FRONTEND

- JavaScript (ES6+)
- TypeScript (familiar)
- HTML5 / CSS3 / SCSS
- Tailwind CSS, Bootstrap
- Responsive & Adaptive UI

## BACKEND & DB

- REST API Design
- JWT Auth, Middleware
- MySQL / PostgreSQL
- Python — Flask, Django

## TOOLS & DEVOPS

- Git / GitHub
- Linux (CLI & Server)
- Postman, VS Code
- Vercel Deployment
- Cursor / Copilot / Claude

## SOFT SKILLS

- Full Module Ownership
- Technical Documentation
- Agile / Scrum Workflows
- Analytical Debugging
- Independent Self-starter

## AVAILABILITY

**Available immediately**
Full-time · Freelance · Remote

# MERN Stack Developer

*MongoDB · Express.js · React.js · Node.js · REST APIs · Full-Stack*

## PROFESSIONAL SUMMARY

Motivated MERN Stack Developer and B.Tech Computer Science graduate with real-world, production-level full-stack development experience. Skilled in building complete applications independently — React.js frontends, Node.js/Express.js backends, MongoDB databases, and REST APIs — from architecture through deployment. Has shipped a live MERN POS system used daily by a real business. A reliable team player with clean coding standards, strong debugging skills, and a drive to write maintainable, performant software. Portfolio: irfanahmed2229.vercel.app

## EDUCATION

**B.Tech — Computer Science & Engineering** · MEA Engineering College, Kerala · *2021 – 2025*

*Data Structures & Algorithms · DBMS · Software Engineering · OOP · Computer Networks · Agile*

## INTERNSHIP EXPERIENCE

**Full-Stack Python Web Development Intern** · Techmaghi · *Sep 2024 – Nov 2024*

- Built a production Blog Web Application using Python/Flask — followed company coding, security, and documentation standards throughout.
- Developed responsive interfaces, implemented JWT token-based authentication, and integrated REST APIs — all delivered on schedule.
- Participated in code reviews, team meetings, and iterative bug fixing; maintained complete technical documentation for all features.

**AI & Robotics Intern** · Stem Robotics · *Oct 2023 – Nov 2023*

- Collaborated in an agile cross-functional team on AI/automation projects — strengthened communication and adaptability in fast-paced environments.

## KEY PROJECTS

**Juice Corner — Full-Stack MERN POS App** — *React.js · Node.js · Express.js · MongoDB · Vercel*

**Live:** juicecorner.vercel.app

- Built and deployed a production-grade MERN stack POS system used daily by a real business — fully responsive across tablet and desktop.
- React.js frontend with Hooks and component-based state management; real-time order tracking and live customer display board.
- Secure Express.js REST APIs, JWT authentication, and MongoDB/Mongoose schema designed for production reliability.
- Sole developer — full SDLC: architecture, development, Postman testing, documentation, deployment, and ongoing maintenance.

**WhatsApp Automation Bot — Skin Clinic** — *Node.js · Express.js · WhatsApp Business API*

- API-integrated Node.js automation system with stateful session management; clean modular code following REST and security standards.
- Full technical documentation for all endpoints and conversation flows; delivered measurable operational improvements for the client.

**Automated Billing System — Public Transit** — *Python · Django · MySQL · OpenCV · YOLOv3*

- High-availability system integrating YOLOv3 computer vision with Django backend and MySQL — full schema design and query optimization.

**Full-Stack Food Ordering Platform** — *JavaScript · PHP · HTML5/SCSS · MySQL*

- Complete responsive multi-module ordering system with dual admin/user panels, cross-browser compatibility, and MySQL database integration.

**Blog Web Application** — *Python · Flask · MySQL · REST API*

- Production blog platform built during Techmaghi internship — complete backend, responsive frontend, JWT auth, and full documentation.

## PORTFOLIO & ADDITIONAL

**Portfolio:** irfan2229.vercel.app

- Deployed and maintaining a live production MERN application used by a real business daily — juicecorner.vercel.app
- AI-assisted development workflow: Cursor, GitHub Copilot, Claude — integrated for speed and code quality.
- Actively advancing: TypeScript, system design, React Query, Context API patterns, AWS/cloud deployment basics.
- Strong written English; comfortable in remote and async distributed team environments.
