# IRFAN AHMED

*Full-Stack Developer · MERN Stack*

irfanahmed9400265514@gmail.com | +91 95392 61066 | Kerala, India
linkedin.com/in/ia2229 | github.com/ia22229 | irfan2229.vercel.app

## PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science with hands-on experience building real production systems — from AI-powered chatbots and MERN stack web apps to computer vision automation pipelines. Able to identify practical technology solutions for real business problems and deliver them independently from architecture through deployment. Comfortable with LLM APIs, REST API design, open-source frameworks, and full-stack JavaScript/Python development. Eager to contribute in a collaborative engineering team and grow rapidly.

## EDUCATION

**B.Tech — Computer Science & Engineering** *Nov 2021 – Apr 2025*

*MEA Engineering College, Perinthalmanna, Kerala*

*Relevant Coursework: Data Structures & Algorithms · DBMS · Software Engineering · OOP · Computer Networks · Operating Systems · Agile Methodologies*

## TECHNICAL SKILLS

| | |
|---|---|
| **AI & Automation** | LLM API integration (Claude, OpenAI), WhatsApp Bot Automation, AI-assisted workflows, Cursor, Copilot |
| **MERN Stack** | MongoDB, Express.js, React.js, Node.js — full-stack JS from REST APIs to responsive frontend |
| **Backend & APIs** | Node.js, Express, Django, Flask, REST API Design, JWT Auth, Token-based Auth, Python |
| **Frontend** | React, React Native, HTML, CSS |
| **Databases** | MongoDB, MySQL, PostgreSQL, SQLite — schema design, queries, optimization |
| **Tools & DevOps** | Git/GitHub, Vercel, VS Code, Linux (CLI & Server), Postman, CI/CD awareness |
| **Languages** | JavaScript (ES6+), Python, PHP, Java, C |
| **Open-Source** | Deploying & configuring open-source tools, Linux environments, self-hosted solutions |

## INTERNSHIP EXPERIENCE

**Full-Stack Python Web Development Intern** *Sep 2024 – Nov 2024*

*Techmaghi*

- Built a production Blog Web Application using Python, Flask, and SQLite — implementing routing, user authentication, and secure data management following industry coding standards.
- Deployed and configured open-source tools and libraries to accelerate development; worked under real project deadlines with collaborative Git-based version control.

- Participated in code reviews and iterative bug fixing; maintained complete technical documentation for all implemented features and REST API endpoints.

### AI & Robotics Intern
*Oct 2023 – Nov 2023*

*Stem Robotics*

- Gained hands-on exposure to AI models, sensor systems, and robotics automation pipelines in a structured crossfunctional team environment.
- Collaborated on AI-based planning and coordination projects; built communication and adaptability skills in a fast-paced engineering culture.

## KEY PROJECTS

### WhatsApp AI Chatbot — Skin Clinic Automation
*Node.js · WhatsApp Business API · REST · LLM Integration*

- Designed and deployed an AI-powered WhatsApp chatbot automating patient queries, appointment inquiries, and clinic communications — a real-world AI agent for routine task automation.
- Built interactive menu flows and session-based conversation state management, reducing manual workload for clinic staff measurably.

### Juice Corner — Live MERN POS System
*React.js · Node.js · Express · MongoDB · Vercel | juicecorner.vercel.app*

- Built and deployed a production-grade POS application for a real business — real-time order management, live customer display board, and digital payment processing.
- Secure JWT authentication, protected transaction flows, and MongoDB/Mongoose schema designed for production reliability. Sole developer across full SDLC.

### Automated Billing System — Public Transit
*Python · Django · MySQL · OpenCV · YOLOv3*

- End-to-end automation system using YOLOv3 computer vision to detect passengers and calculate fares automatically — integrated live camera feeds, facial recognition, automated billing, and digital receipt generation.
- Complex schema design and query optimization on MySQL; debugged integration issues across the full vision-to-billing pipeline.

### Clinic Website & Digital Transformation
*React · Node.js · Vercel*

- Led digital transformation for a medical clinic — designed and deployed a responsive website, automated patient communication flows, and created digital marketing assets.
- Delivered measurable improvement in the clinic's digital presence and operational efficiency through targeted technology implementation.

## ADDITIONAL

**Portfolio:** irfan2229.vercel.app

- AI-assisted development workflow: Cursor, GitHub Copilot, Claude — integrated for speed and code quality across all projects.
- Actively advancing: TypeScript, system design patterns, React Query, AWS/cloud deployment, Docker basics.
